

## Visiting Researcher Seminar

—part of the IHBI Seminar Series

Monday 27 February, 1pm—2pm

# “Driving Simulation of Railway Crossing Safety Improvements: Design Decisions and Driver Evaluation”

**Dr Jeff K. Caird**

**Cognitive Ergonomics Research Laboratory  
University of Calgary  
Alberta, CANADA**

Associate Professor Jeff Caird is part of the Research Group: “[Perception, Aging and Cognitive Ergonomics](#)” at the University of Calgary in Canada. His research interests include:

- cognitive ergonomics, engineering psychology;
- forensic human factors;
- human-computer interaction;
- human error;
- injury epidemiology;
- medical human factors; and
- transportation human factors.

His seminar will discuss studies which have used a simulated railway crossing to evaluate a series of safety design features and tested on drivers of different ages.

**Date:** Monday 27 February

**Time:** 1.00pm—2.00pm

**Location:** Room C318  
QUT Carseldine Campus  
Beams Road  
(Please refer to next page for Campus map)

Please confirm your attendance at this Seminar by Friday 24 February, by contacting the CARRS-Q Marketing and Events Officer, Christine Gustafson...

**Phone:** 07 3864 4568  
**Email:** c.gustafson@qut.edu.au
